

Environmental Policy

PURPOSE

We recognise the importance for society of responsible, solidarity-based action to ensure a healthy, sustainable environment. Our interest in monitoring and managing our activities and their environmental impact has led us to draw up this written commitment to the environment on the part of the management of the Palacio Euskalduna complex.

PURPOSE

To factor the procedures required to monitor and manage the environmental impacts resulting from the activities of the Palacio Euskalduna complex into our management system throughout the relevant life cycles, thus enabling us to ensure rational use of resources and reduce the waste, discharges and emissions produced.

PRINCIPLES

- ❑ A commitment to protect the environment by preventing environmental pollution and establishing procedures and working systems that ensure environmental friendliness and take into account the right of society to enjoy a healthy environment.
- ❑ Establishment of environmental goals and targets to help us continually improve our commitment to the environment.
- ❑ Compliance with legislation and all regulatory requirements in force, and further commitments made voluntarily by the Palacio Euskalduna complex.
- ❑ Reporting of our commitment to environmental protection and friendliness to our suppliers, concession holders, collaborators, etc.
- ❑ Encouraging of responsible, solidarity-based behaviour in regard to the environment among our staff.
- ❑ Adopting of all measures required to ensure the right to enjoy a healthy, sustainable environment as recognised in the Declaration of Bizkaia on the Human Right to the Environment.

The General Management therefore undertake to provide all available resources to attain the goals set, and to adapt them in line with developments in environmental matters.
